

Procedure to block all the sites and allow only particular websites

Procedure to block all the sites and allow only particular websites

1. Open "escan Protection Centre".
2. Goto Web Protection>>Settings>>Adult>>Custom.
3. Select the "Block Web access" radio button.
4. Select on "Websites_Allowed".
5. On the right hand side (under "Site Names) you have some default sites mentioned. Select all of them and click the "Del" button.
6. Then click on the "Save" button.
7. On the right hand side (in the text box besides the "Add" button) enter the site names to be Allowed. And then click the "Add" button.
Eg: *.yahoo*. (to allow all the websites which have yahoo in the site name)
www.gmail.com (to allow gmail.com)
www.rediff.com (to allow rediff.com)
8. Click on the "Save" button and then "Apply" and "Ok".

This will only allow the websites mentioned under the "Websites_Allowed" section and all the other websites will be blocked.
