

How to manually whitelist a Malware URL

Method 1:

1. Try to access the URL.
2. You will get a pop-up, as "Malware URL Blocked" and below you will have a check box "Add to Whitelist".
3. Check the box "Add to Whitelist" to whitelist the specific URL.

_*

Method 2:

- *_1. Apply the latest hotfix.
2. Reboot the machine
3. Try to access the URL
4. Then you can Whitelist the URL manually from the Protection center>>File AV>>View reports
5. Right click and the click on "Add to Whitelist".

_*_Please Note:*_ This Feature is avialable with 1.0.0.927 and above
