

Update: How to add authentication info for proxy while downloading eScan hotfix using WGWIN?

You can edit "**wgwin.ini**" file from following directory

C:\program files\common files\microworld\wgwin (For 32 bit)

OR

C:\program files (X86)\common files\microworld\wgwin (For 64 bit)

In this file search for following entry

[HTTP]

HTTPProxyServer= [Here you will find your Proxy IP]

HTTPProxyPort= [Here you will find your proxy port]

HttpUser=

HttpPassword=

ProxyUser= [Here please enter the username]

ProxyPassword= [Here Please enter the password]

Save the file and then try to download the hotfix, it should resolve the problem.

Unique solution ID: #1127
