Installation: Does SQL server installed on the server along with eScan Corporate/SMB editions require a Microsoft SQL server license?

No, eScan uses, SQL server Express edition which is freely redistributable, and does not require any license, but it has below limitations.

Microsoft SQL 2005 Express edition supports database size upto 4 gb

Microsoft SQL 2008 Express edition supports database size upto 8 gb

If any customer is having more than 1000+ endpoints, we recommend them to use SQL Server license edition which supports unlimited database.
