How do I install/uninstall eScan for Mac into my Mac system?

For your convenience, eScan provides two methods for installation — CD/DVD-ROM/USB (Media) and Website (Online).

## Installation:

- Insert CD/DVD-ROM into the drive or plug in the USB drive into the USB port or download the **eScan\_Anti-Virus.dmg** file from the [www.escanav.com](http://www.escanav.com) website.
- Locate the **eScan\_Anti-Virus.dmg** file and double-click it.

## Un-installation:

- Locate the **eScan** folder and simply click **Uninstall eScan**  icon to uninstall, for complete instructions, refer **Installation Guide** from our [www.escanav.com](http://www.escanav.com) website.
