# eScan Anti-Virus Security for Mac: How can I scan my system for viruses?

**How can I scan my system for viruses?**

With the option of on-demand scanning, user can run scanning on the entire system, files/directories, USB devices like Pen drive, CD-ROM device, and so on. Under **Scan** module, you have various scan options.You can also run scanning on specific time intervals through scheduled scanning option under **Scheduler** module.
