eScan for Android: Where does eScan Mobile Security store the Contact/SMS Backup files?

eScan Contacts Backup

Backup Filename: eScan_Contacts_backup.vcf

Location for Android version below 4.4(Kitkat): Device Memory (Root) / SD card (Root)

Location for Android version 4.4 (Kitkat) and above:

Device Memory\Android\Data\com.eScan.main\

OR

SD card\Android\Data\com.eScan.main\

eScan SMS Backup

Backup Filename:eScan_SMS_backup.db

Location for Android version below 4.4(Kitkat): Device Memory (Root) / SD card (Root)

Location for Android version 4.4 (Kitkat) and above:

Device Memory\Android\Data\com.eScan.main\

OR

SD card\Android\Data\com.eScan.main\

Note: Backup will overwrite the existing backup file on the device. It is always a good practise to keep a copy of the old backed-up file on your Personal Computer/Laptop/External HDD.
