

Release Notes: eScan ver. 10.0.1058.677 (Date: 26-March-2010)

1. Major changes in eScan for language support.
2. Changes made in Endpoint Security for the USB popup. Pop used to come after a long time (around 15-20 seconds) when the pen drive is inserted for the first time. This has been corrected.
3. For Bind Error in eScan Management Console, we will add "2000-2005" in HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Services\Tcpip\Parameters\ReservedPorts
4. Logs greater than 100MB were not getting deleted. Logic to delete the same changed in new eScan Monitor.
5. When right click on an archive, and scan it, the contents of the archive will be scanned.
6. When non-disinfectable file is extracted to a local drive, 0 byte file will not be created. It will be deleted.
7. Changes made in installer for writing correct OS string
8. Reserved system files within windows subfolders will be properly detected.
9. Max Archive Scan size, which was earlier 2MB has been increased to 32MB.
10. Changes in eScan Protection Center to add TeamViewer application in the default list of application rules.
11. TeamViewer application in default application exclude list.
12. Changes made in installer for eScan shell extension on 64-bit operating system.
13. Latest Spyware database added.
14. New Virus signatures added.
15. New MWAV Engine added.

Unique solution ID: #1221
