

eScan Mobility Management (EMM / eScan MDM): Can eScan apk be installed on the devices remotely/automatically?

eScan APK **cannot** be installed on the devices remotely/automatically.

The procedure for installing eScan is as below.

1. Add the device to the console.
2. The console will send an email to the user's email address that is provided while adding the device. All the required details along with the download link for the eScan APK file will be provide in the email.
3. The user will have to download the APK file, install the APK file on the device, add the necessary details as per the email on the device and enroll the device.

Unique solution ID: #1269
