

eScan Mobile Security for iOS: I mistakenly deleted device from the anti-theft Portal. How can I Add it again?

Whenever you delete a device from the Anti-theft portal, all settings from the device are automatically deleted. To add the device again,

open eScan App on device and go to anti-theft or
Contact Backup and add account (already registered with eScan).

Re-login to the eScan Anti-theft portal. The device will be added to the listed devices.
