

eScan Mobile Security for iOS: I took backup of the data from device, where can I access the backed up data?

eScan will take backup of the data directly on to the anti-theft portal. You can access the backup files using the following steps –

1. Go to eScan Anti-theft Portal.
2. Login to your account using valid credentials.
3. Select device
4. Click on View Details under Backup.

It displays the time stamp of the Last backup taken along with option to download the backed up file.

Unique solution ID: #1305
