

Miscellaneous: Receiving unknown messages in Skype and Yahoo Messenger

Problem reported:

After logging into Skype and Yahoo Messenger user receives unknown automatic messages from the contact lists.

Please refer to the attached screenshots.

Solution:

Checked below Registry path and found incorrect startup entry of JUSCHED.EXE.

"HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Run"

Deleted the file from c:\windows folder and cleared the Messages History from the respective Messengers.

Note: The genuine Java(TM) Update Scheduler (jusched.exe) file should be available in the path where Java is installed default on the system and not in \windows folder.

Unique solution ID: #1052
