

# File Antivirus: Machine slowing down

Machine slowing down while opening any mapped drive or workgroup computers.

Open the eScan protection center > File antivirus > Objects > Remove the check from “Scan network drives” and check. Please note that the same setting can be done through registry  
HKEY\_LOCAL\_MACHINE\SOFTWARE\MicroWorld\eScan for Windows\MwMonitor\ and

Set the DWORD value of “disable network scanning” to 1.

Unique solution ID: #1019
